DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention of a method of inspecting a jet pump beam in a nuclear reactor:

A: Wherein positioning at least one ultrasonic phased array probe comprises: a) positioning a first probe adjacent the bottom surface of a jet pump beam first arm; b) scanning the first arm with the first probe; c) re-positioning the first probe adjacent the bottom surface of a jet pump beam second arm; and d) scanning the jet pump beam second arm with the first probe (e.g., see claims 2, 5 and 12).

B: Wherein positioning at least one ultrasonic phased array probe comprises: a) positioning a first probe adjacent the bottom surface of a jet pump beam first arm; b) positioning a second probe adjacent the bottom surface of a jet pump beam second arm; c) scanning the first arm with the first probe; d) scanning the second arm with the second probe (e.g., see claims 3, 7, 8, 13 and 117).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick Palabrica whose telephone number is 703-306-5756. The examiner can normally be reached on 7:00-4:30, Mon-Fri; 1st Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Carone can be reached on 703-306-4198. The fax phone numbers
